

DISTRIBUTION OF UNIQUE BAL TIC GEMSTONE PRODUCTS

KALNINGRAD AMBER COMBINE, JSC

This is the only enterprise in the world where the unique Baltic amber has been commercially mined and processed for more than seven decades.

The company was established on the basis of the Königsberg Amber Manufactory on **July 21, 1947**. Since **2013**, it has been under the management of Rostec State Corporation.

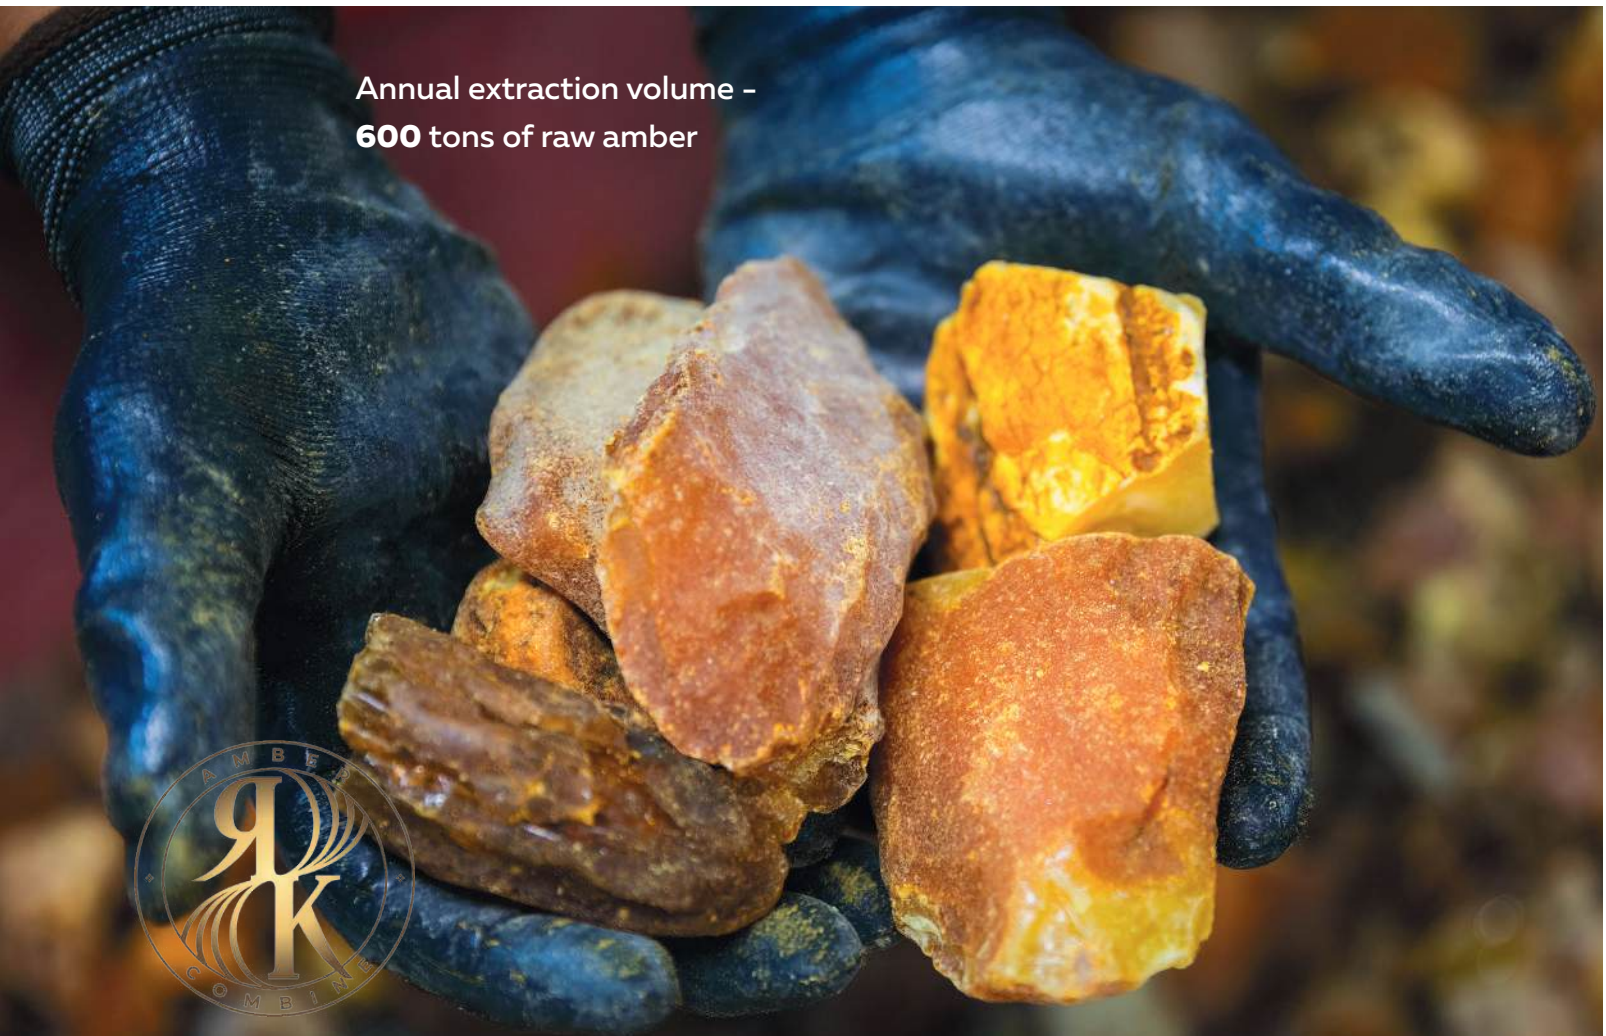

AMBER COMBINE

develops the Primorskoye field
in the Kaliningrad region,
near the village of Yantarny

Annual extraction volume –
600 tons of raw amber

The explored reserves of this deposit will allow to mine amber there for the next 100-150 years.

AGE

Succinite (the scientific name for Baltic amber) is 40-50 million years old.

Due to its high content of succinic acid (up to 8%), Baltic amber is famous for its healing properties and positive energy.

INCLUSIONS

The Baltic gem is characterized by warm, sunny hues (orange, yellow, honey, cream, white) that endow it with an almost mystical beauty.

~~~~~  
Rare prehistoric inclusions of flora and fauna  
several tens of millions of years old - inclusions -  
can be found in amber.  
~~~~~

JEWELRY PRODUCTION

Almost simultaneously with the launch of mining, the company organized its own processing facility - the Amber Shop. The combine is famous for its own school of artistic processing of amber, which was based on the most famous Russian artists-researchers of the sunstone - Meos, Popov and Lis.

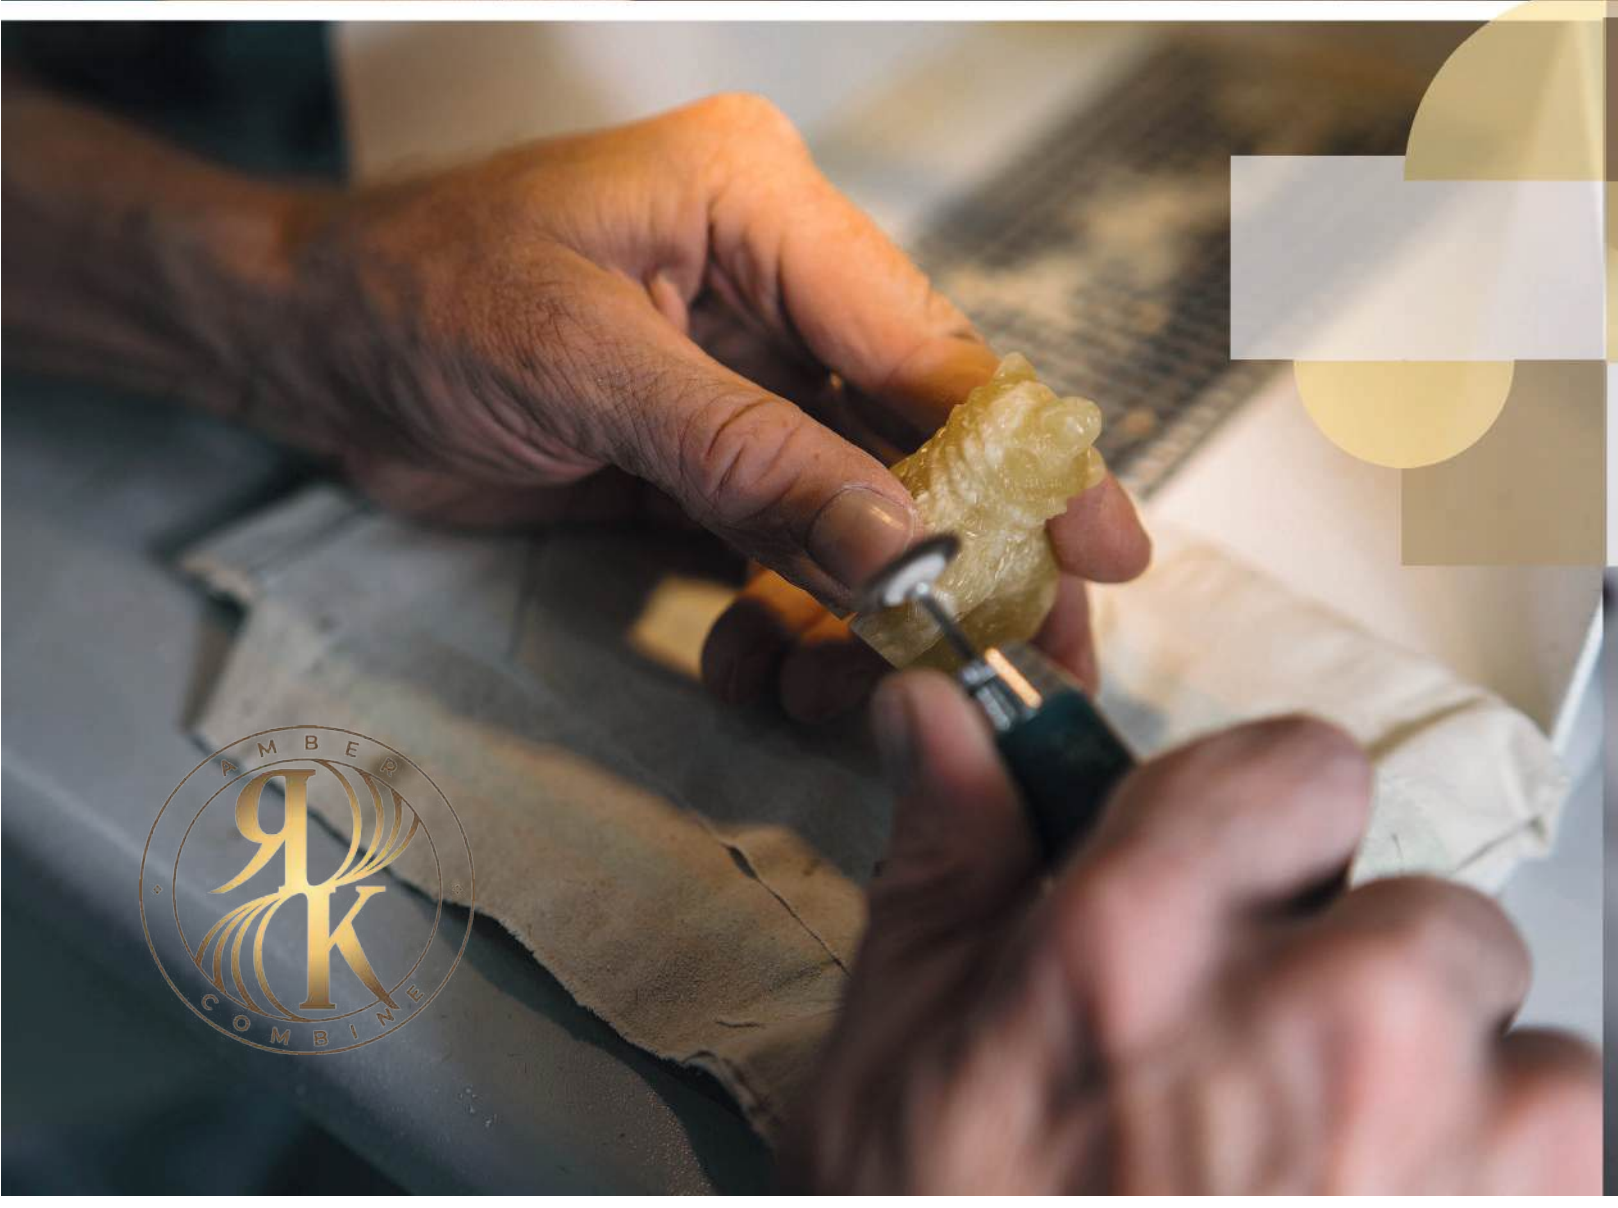

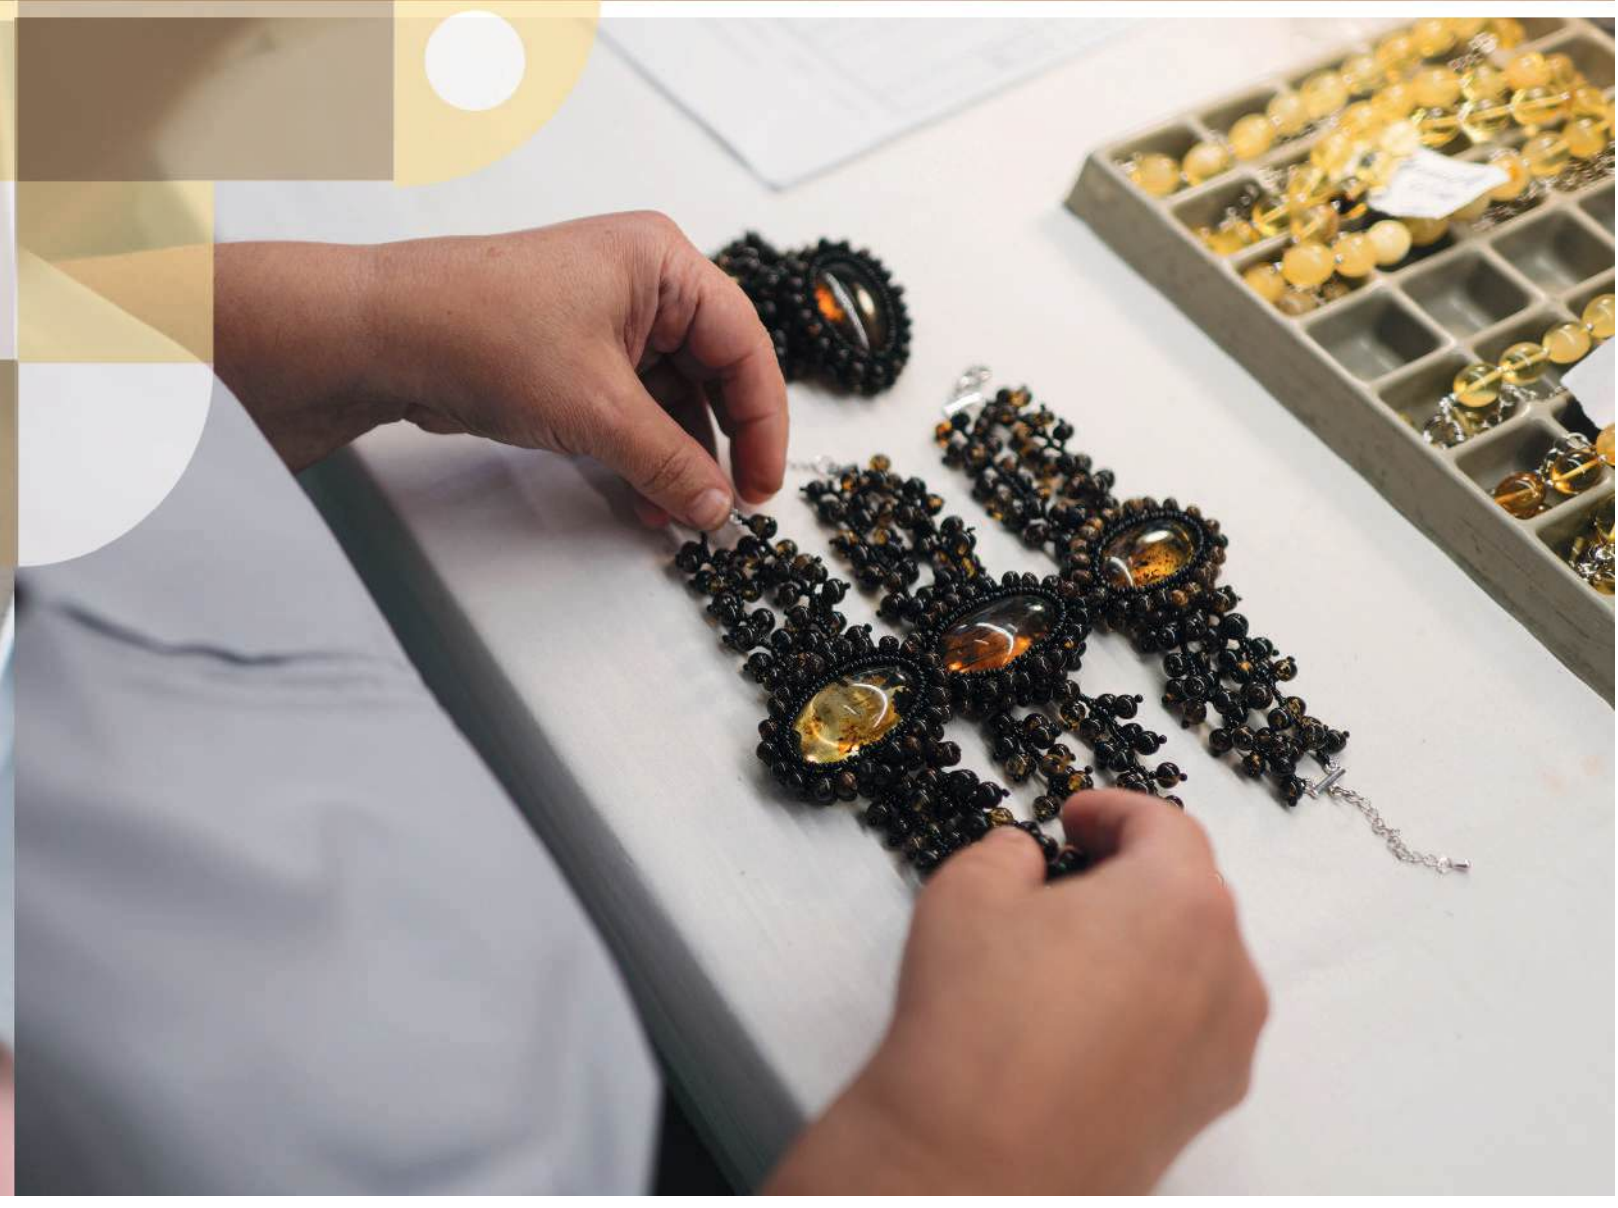

~~~~~  
In 2021, the company will launch a modern upgraded jewelry production facility with an amber processing capacity of up to 50 tons of amber per year.  
~~~~~

PRODUCTS

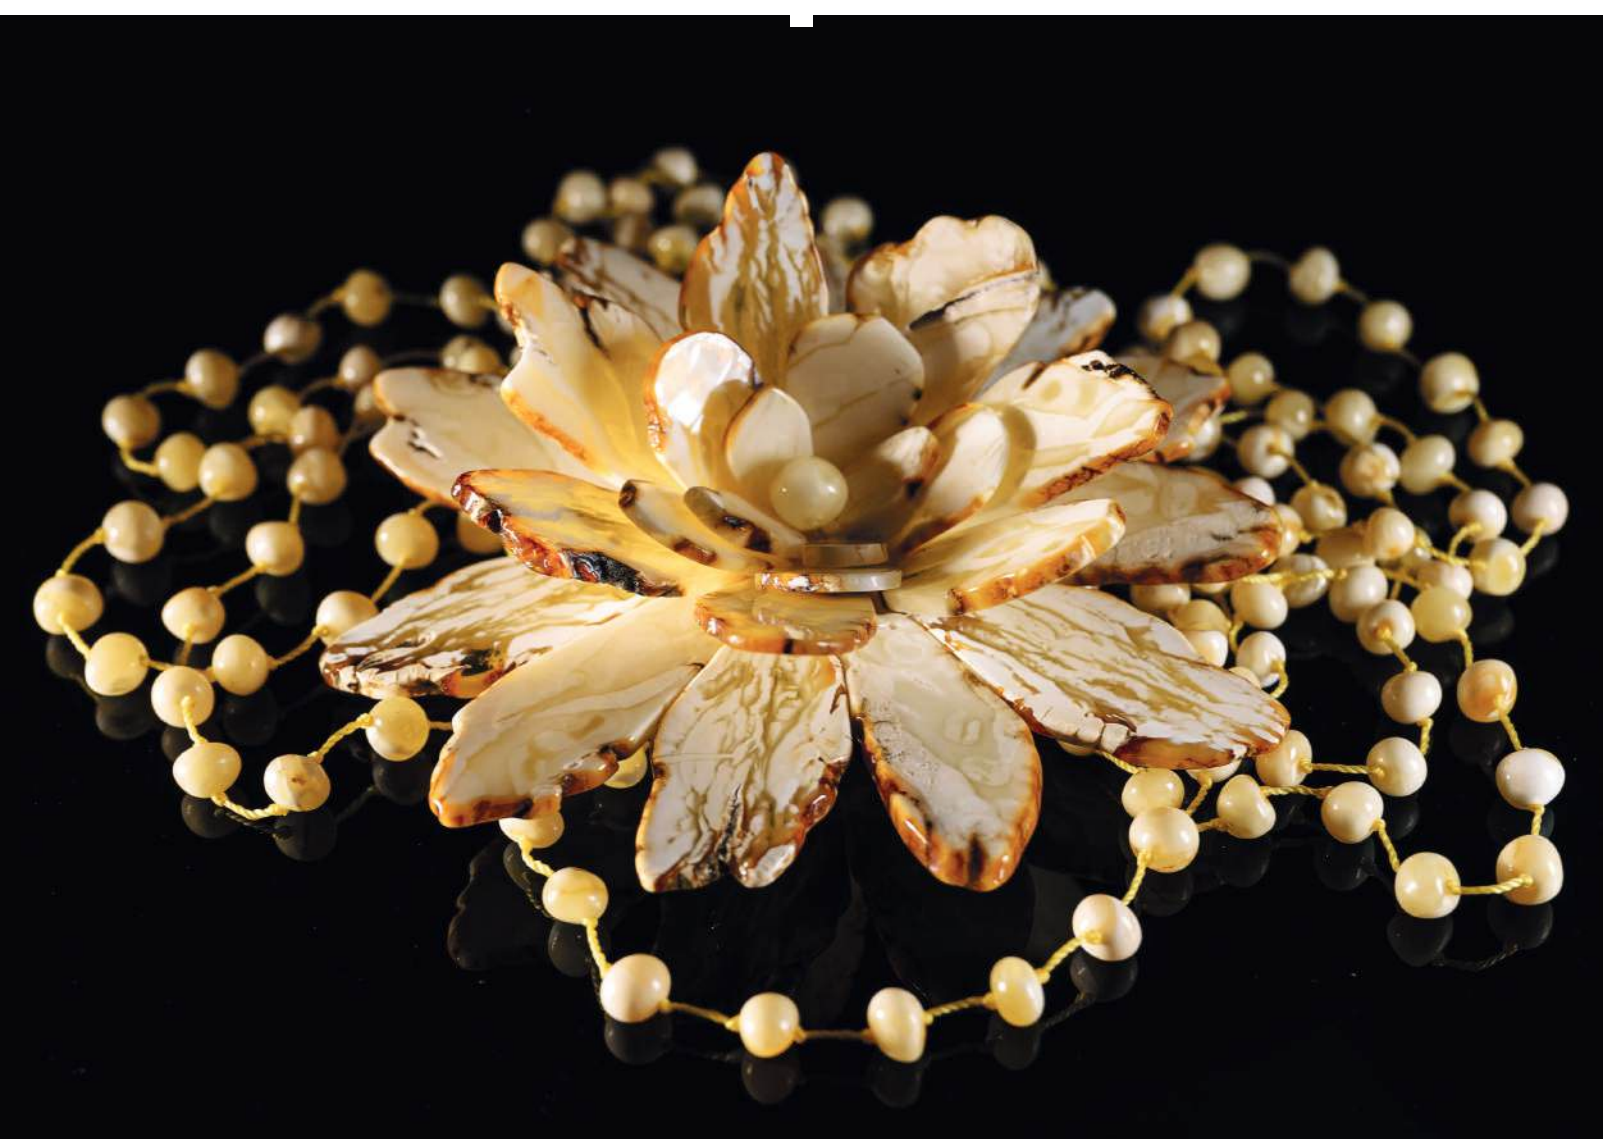

The natural features of the gem and modern processing technologies that allow to change the color of amber, artificially age it and even cut it like a diamond, allow artists and stone cutters of the company to create exclusive souvenirs and works of art from amber.

The number of products manufactured at the in-house production facilities of the Amber Combine reaches 150 thousand per year.

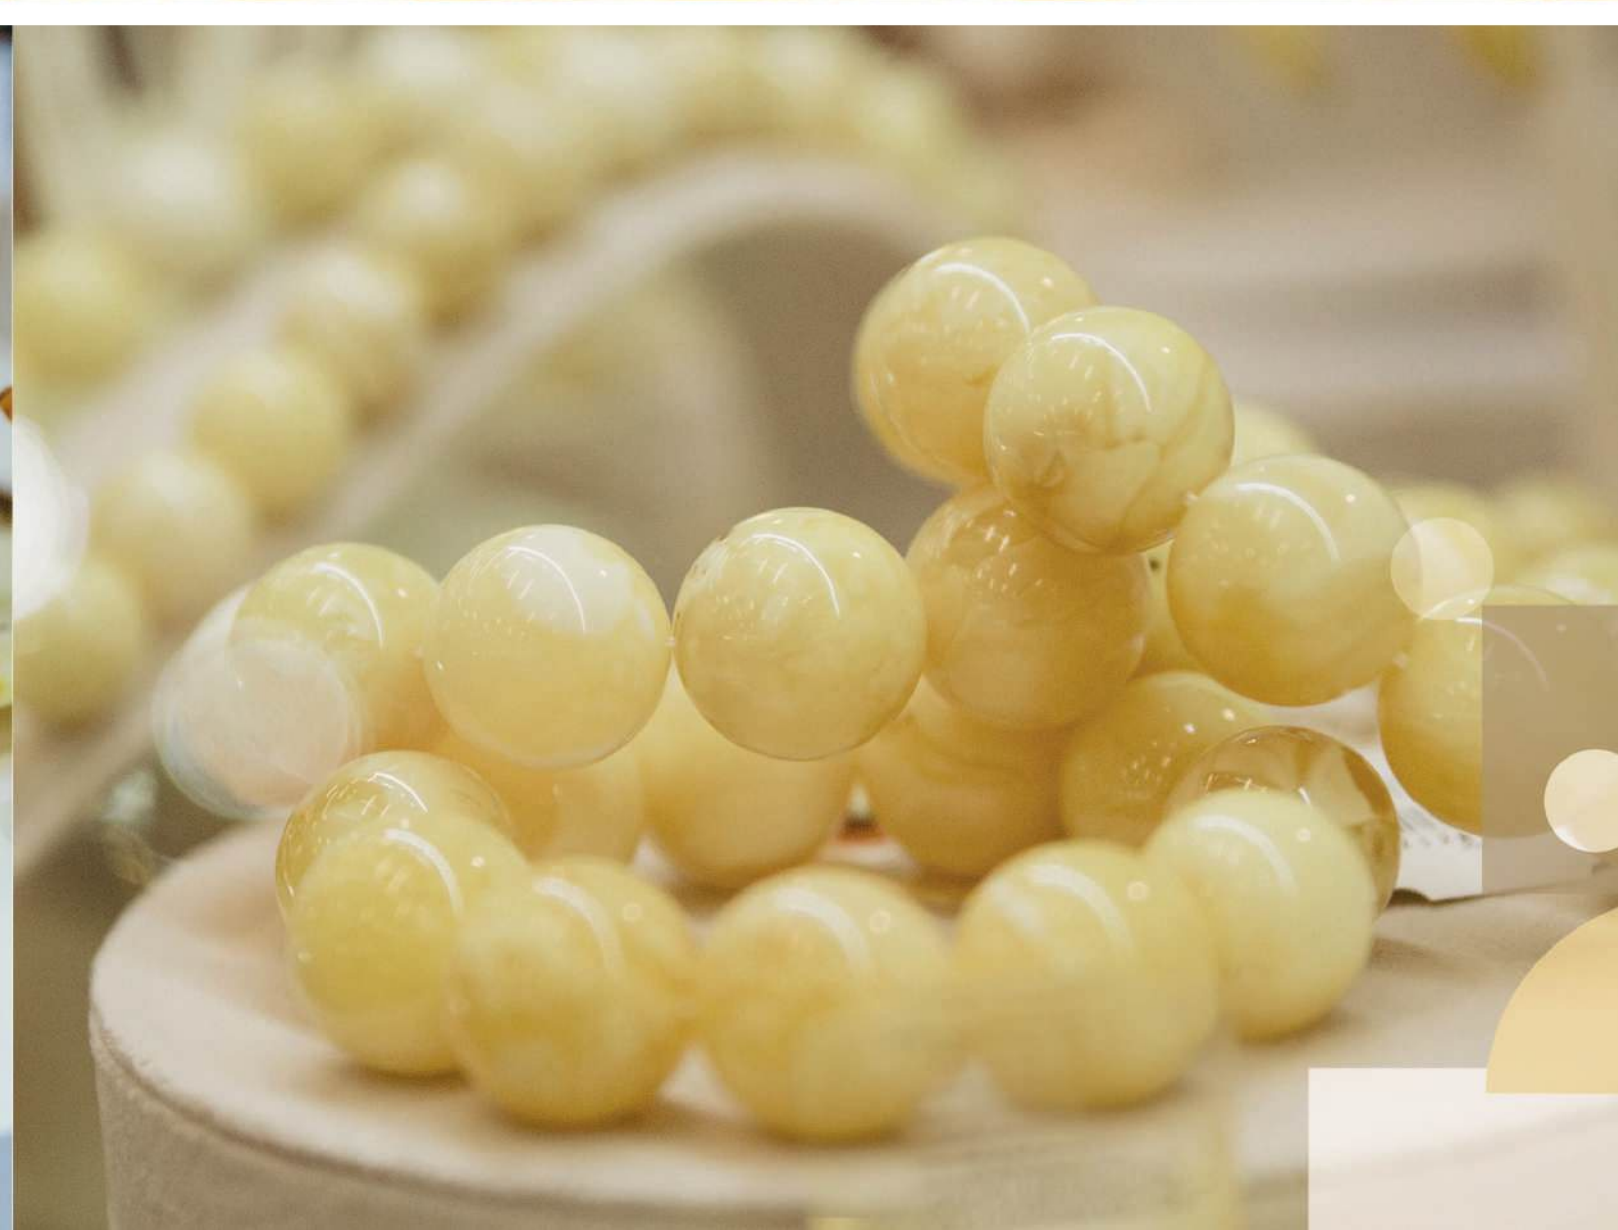

AMBER FASHION HOUSE

~~~~~

This is the world's only platform fully dedicated  
to creative experiments in the field of creating trendy jewelry  
and accessories made of the sunstone.

~~~~~

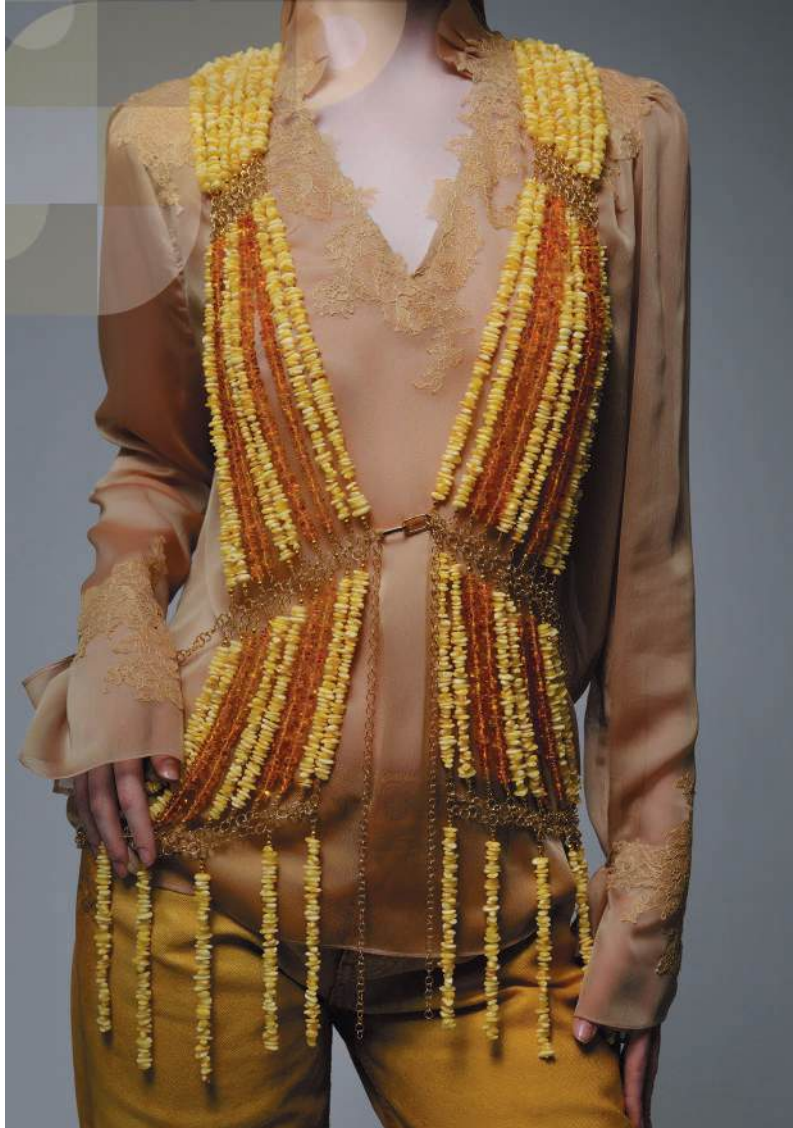

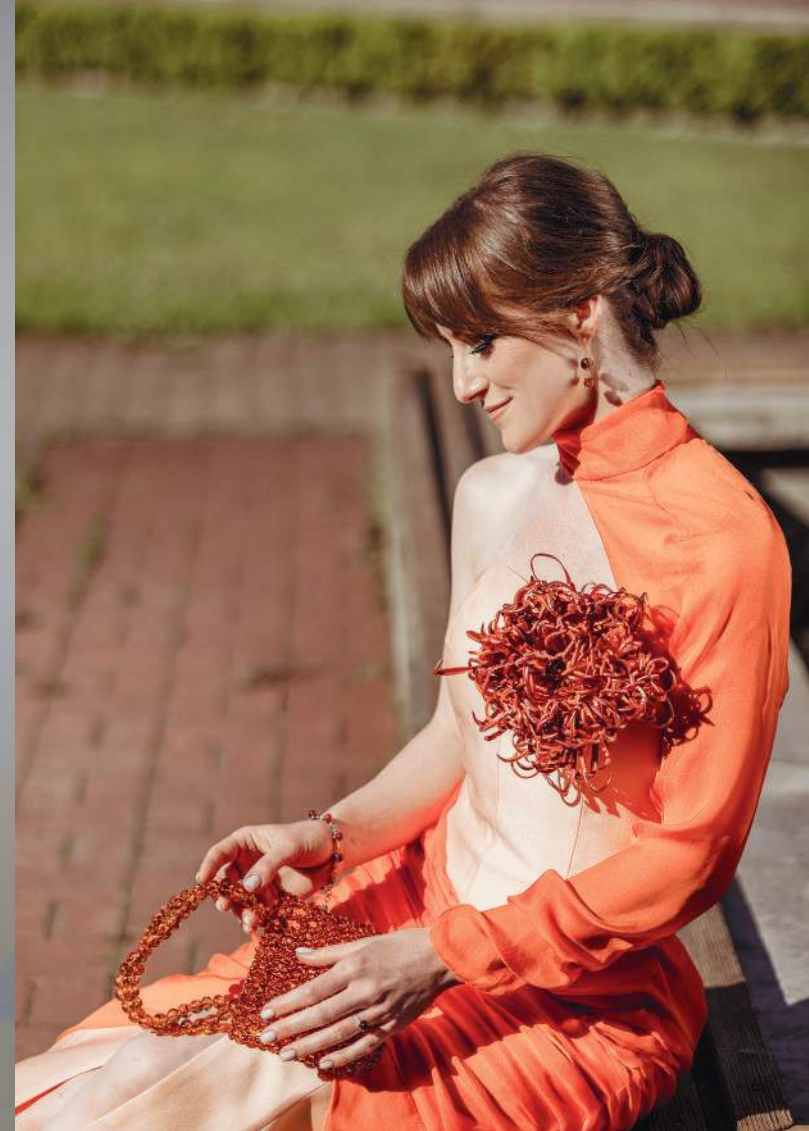

CLOTHING

Under the brand of the Kaliningrad Amber Combine an exclusive collection of clothes has been created, in which the gem is inlaid directly into the fabric of the outfit, or acts as a part of classic textures, for example, appears in the form of buttons or embroidery.

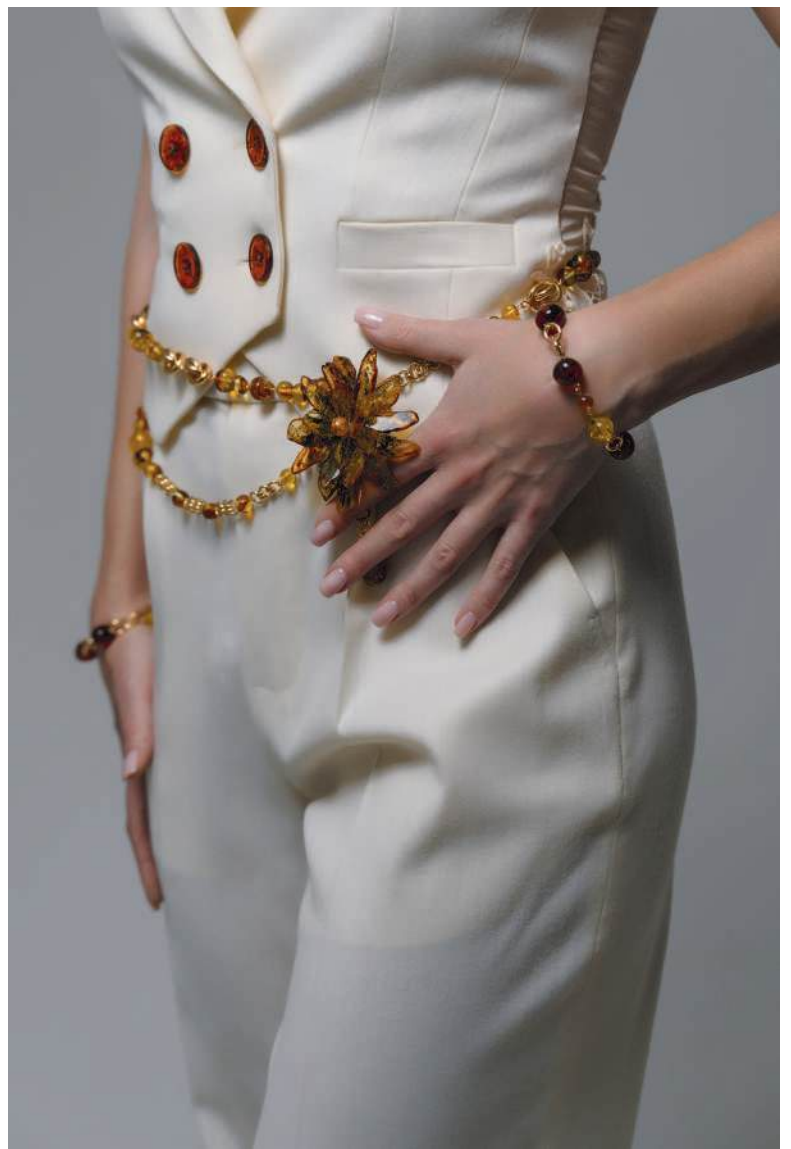

LUXURY SOUVENIRS

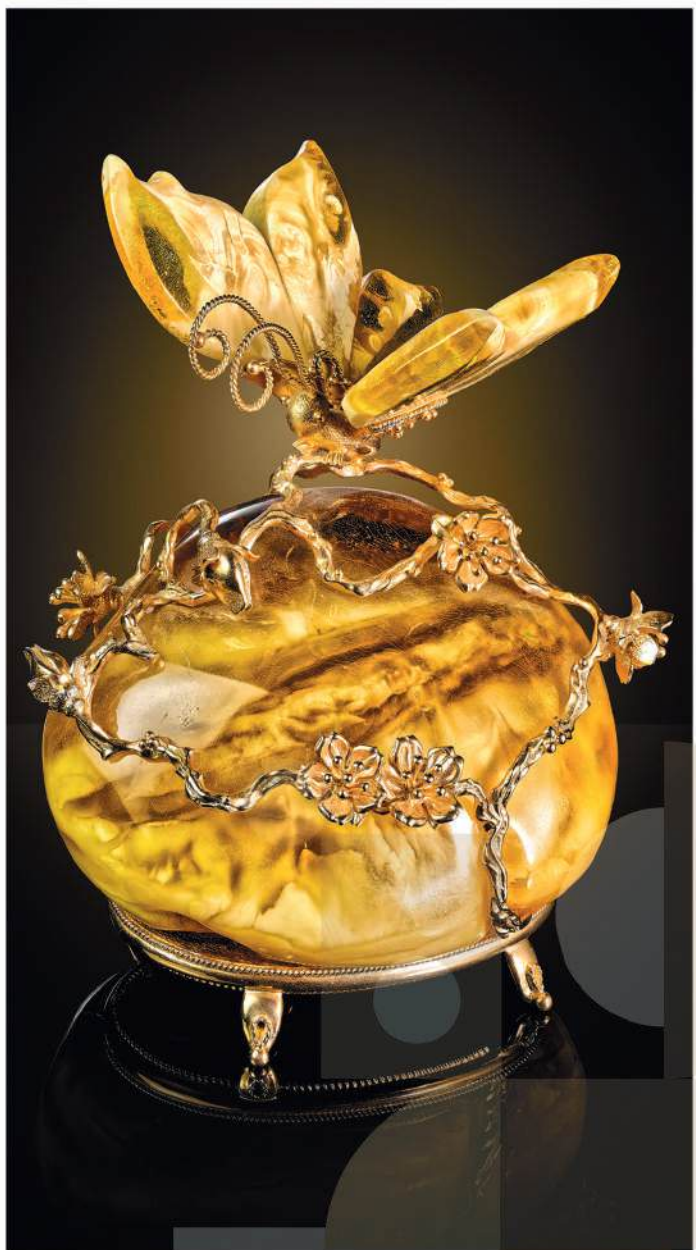

Specialists of the Amber Combine in artistic carving feel the character of the fragile but willful stone.

Stonecutters, like sculptors, are able to create a sculpture from a piece of amber with the smallest detail, endowing it with a soul.

Statuettes and sculptural compositions from the sun gem are completely handmade and can be made in any theme.

TIGER

The Amber Combine creates unique one-of-a-kind customized works of art. In 2022, a life-size sculpture of an Amur tiger was made for the Eastern Economic Forum in Vladivostok. In 2024, an interior souvenir "Spasskaya Tower of the Moscow Kremlin" was made for AmberForum 2024.

DECOR

The Amber Combine offers an exclusive service of decorating the interior of cars, yachts and airliners with Baltic amber. It includes development of a design project and its realization "from and to". The project can include the widest possible range of products, starting from wall moldings, side panels, chair armrest trim and finishing with custom-made interior items.

STORES

Amber Combine's own retail outlets have been opened in several cities of the Kaliningrad Region, Moscow and St. Petersburg.

We are preparing to launch stores in cities with millions of people in Russia and franchise outlets in China and Hong Kong.

The key rule of the Amber Combine franchise:

"One city - one partner".
